

PROJECT MAKING  
Milestone 4: Final Project Presentation

---

**Specifications:**

1. Complete all the features and functionalities you proposed for your web application.
2. Considering the limitations you experienced from the previous milestone in terms of data handling, modify your database to cater these needs.
3. Configure HTTPS on your web server (web security as discussed in the lecture)
4. Write a complete documentation (hard copy, A4 size, single-spaced, TNR 12) of your project to be submitted during the project presentation. It should include all the functionalities and features that you proposed and accomplished during the project making.

**Guidelines:**

1. All project presentations will be done during class hours next week, **December 2-5**.
2. **All members of the group** are required during the project presentation.
3. All files (.php, .html, .sql, .txt, etc) and resources **shall be submitted in a CD**.
4. Wear **smart casual attire**. Make yourself presentable for the next item.
5. Bring cameras for *selfies* and group pictures as sentiments for the whole semester in CMSC 100.

*“In this life, the only person that will hinder you to do great things is yourself. So tame it and push it to the top caliber.”*
